

Every answer takes longer than it should.

E

Searching email for the right response to send

R

Recalling a procedure or policy from memory

W

Rewriting the same message for the fifth time

There is a faster way — and you already have access to it.

Here is what changes.

The same work — done faster, with less digging.

D

Draft any email in under a minute

Your tone. Their situation. Done — without starting from a blank page.

A

Get answers without digging

No more hunting through old emails or asking someone to pull up the policy.

W

Turn rough notes into clear writing

Paste your bullet points in. Get a polished draft back in seconds.

F

Ask what you would normally save for later

How does this work? What is the right process for this?
Get the answer now.

Here is what we are covering today.

40 min total

1

Getting in and getting started

How to log in, find your projects, and send your first message.

10 min

2

What is available right now

What the AI Advisor does, what the screen shows, and what is coming next.

10 min

3

How to get good results

The three-ingredient formula and how to fix it when the answer is not right.

15 min

No install. No setup. Your work email and a browser is all you need.

How to Get In

STEP 1 OF 2 - LOG IN AT CLAUDE.AI

1

Go to claude.ai

Sign in with your @k12sta.com work email

NOT your personal Gmail.

NOT the Google sign-in button. If you have not received an invite, check spam or contact Adam.

Common gotcha:

Seeing "Personal" instead of School Tech? Wrong account. Log out and use your work email.

Think fast,
build faster

Brainstorm in chat, build in Cowork

 Continue with Google

OR

Enter your email

Continue with email

By continuing, you acknowledge Anthropic's Privacy Policy and agree to get occasional promotional emails and notifications.

 Download desktop app

How to Get In

STEP 2 OF 2 - FIND YOUR PROJECTS

2

Find Projects in the left sidebar

Click a project name. Start typing. That is it.

Pre-configured

Every tool is already set up. No settings, no onboarding inside the tool.

Just open and ask

Do not explain School Tech. Do not set context. Just type your question.

No setup needed

Each Project already knows our products, customers, and workflows.

What's Live Right Now

LIVE

AI Advisor - All Staff

Your starting point for AI at School Tech.

- Explore where AI could fit your daily work
- Find out what tools are built or coming
- Frame an idea to bring to Adam
- Get plain-language answers about the AI program

Projects > AI Advisor > start typing

ALSO LIVE - cohort tools

STA Support Chat (Chris, Tyler) | STA Salesforce Cohort (Tanya, Joanie, Kelsey, Adam) - see Staff AI Tools Reference for details.

What You Are Looking At

1 Navigation tabs

Chat, Cowork, Code. Start in Chat.

2 Pinned Projects

Your pre-built tools — AI Advisor lives here.

3 Message box

Type your question here. No setup needed.

4 Model selector

Set to Sonnet. Switch to Opus only for the hard ones.

5 Your chats

Past conversations with this project.

Better input = better output.

Hit all three ingredients for a useful first draft.

See the Difference

WEAK PROMPT

Help me write a response to a customer complaint.

The tool has to guess:

- What the customer complained about
- Which product or service
- What outcome you want
- What tone is appropriate

Result: a generic template that needs significant rework.

STRONG PROMPT

A customer emailed saying their time clock stopped syncing after last Tuesday's update. They're frustrated - second time reporting. Draft a calm response that acknowledges the issue, gives a realistic timeline (still diagnosing), and keeps it professional. Here's their email: [paste]

The tool has to work with:

- P** Product, issue, and timeline
- M** Customer mood and history
- T** Tone goal and desired outcome
- E** The actual email to respond to

The One Rule

Never paste information you would not share outside the company.

Student data

Names, IDs, grades, attendance, test scores — anything from Skyward. This includes photos and contact info.

Personal / HR data

SSNs, payroll, performance reviews, medical information, employee records or any identifiable personal detail.

Keys and credentials

Passwords, API keys, tokens, login credentials for any platform, internal account numbers.

When in doubt - do not paste it. Check the Restricted Data Reference Guide or ask Adam first. Connecting a tool to another system? Ask IT first.

When It's Wrong - Don't Start Over

Stay in the same conversation. The tool remembers everything from this session - context is still there.

Name exactly what's wrong

1

Do not say "that's not right."
"Too formal - this customer is casual. Rewrite just the opening paragraph."

Add what you left out

2

Generic response = missing detail.
"Should have mentioned - this district is 3 months in. They do not know our process yet."

Keep what's working

3

If 80% is right, say so.
"First two paragraphs are good. Just rewrite the closing - it sounds like we're making excuses."

Ask for options

4

Not sure what tone you want?
"Give me two versions: one short and direct, one that walks through the resolution."

Before you leave this room.

1

What you can do right now

Draft emails. Get answers. Turn rough notes into clear writing. You have access today — no waiting.

2

Your first task (do it today)

Open claude.ai. Find something from this week's work. Ask it to help. That is it.

3

Your reference card

Quick Reference Card lives on the Training Hub, in the header. Keep it open for the first week.

4

Questions and help

Adam Baker - adamb@k12sta.com
Tool wrong or says it does not know? It does not know it YET. Tell Adam.

If a tool does not know the answer - it does not know it YET. Tell Adam. That is how the system gets better.
